Sneha Pandit

AI-Powered Web Developer | Full-Stack + LLM Integration |
GSSoC'26 Project Admin | Open Source · Cloud · Accessible Tech
Mathura, Uttar Pradesh, India

Summary

I build AI-powered web applications — and I care deeply about who they're built for. Over the past 4 years as a freelance developer and now as an AIML engineering student at GLA University, I've shipped production-grade solutions that blend LLM integration, accessible design, and clean full-stack architecture. What I actually do: → Build and deploy AI-integrated web apps (OpenAI API, cloud-native, responsive) → Contribute to open-source projects solving real-world accessibility and civic problems → Mentor peers in cloud computing as a Google Cloud Arcade Facilitator (Cohort 2, 2025) → Lead open-source contributor teams as a GSSoC'26 Project Admin Recent work I'm proud of: - AI accessibility tool for visually impaired users — built with Janshayog, focused on usability-first design and real user testing - Government scheme discovery portal — full-stack, responsive, designed for citizen usability at scale - 4 years of freelance delivery — from concept to launch, across AI-enhanced web products My edge: I sit at the intersection of engineering and empathy. I don't just integrate AI — I think about who uses it and why it needs to work. That's what drives my work in open source, accessibility tech, and community mentorship. Currently exploring: Roles in AI Engineering, Applied AI, Forward Deployed Engineering, or Developer Advocacy — where I can build fast, contribute to real systems, and work with teams that care about impact. Let's connect if you're building something that matters.

Experience

GSSoC JEC Jabalpur

2 months

Project Administrator

May 2026 - Present (2 months)

remote

- Administering open-source projects for GirlScript Summer

of Code 2026, coordinating contributors across distributed teams to ensure timely, high-quality deliverables.

- Reviewing pull requests, triaging issues, and maintaining project documentation to lower barrier-to-entry for first-time contributors.
- Driving contributor onboarding and community engagement — creating a structured experience for new open-source developers.

Contributor

May 2026 - Present (2 months)

Freelance | Self-Employed

Freelance Web Developer

August 2022 - May 2026 (3 years 10 months)

- Delivered 10+ production web applications end-to-end for clients across, from requirements gathering through deployment and iteration.
- Integrated LLM and AI APIs (including OpenAI-compatible tools) into client products to automate workflows and improve user engagement — reducing manual effort on key user tasks.
- Built responsive, accessible front-ends using [your actual stack — React, HTML/CSS/JS, etc.], consistently delivering within client timelines.
- Maintained long-term client relationships, with repeat engagements accounting for a significant share of project pipeline.

Google Cloud Skills Boost

Google Cloud Arcade Facilitator – Cohort 2 (2025)

August 2025 - September 2025 (2 months)

- Selected as facilitator for Google Cloud Arcade Program Cohort 2 (2025) — one of a limited cohort chosen to guide peer learning in cloud infrastructure and developer tools.
- Organized workshops and mentorship sessions to help peers complete skill badges and hands-on labs across Google Cloud services (Compute, BigQuery, Vertex AI).
- Actively promoted cloud literacy within technical

communities, contributing to measurable increases in badge completions among mentored peers.
[Add number of peers/badges if you tracked it]

GirlScript Summer of Code

Contributor

July 2025 - September 2025 (3 months)

India

Excited to share that I've been selected as a Contributor for GirlScript Summer of Code 2025 (GSSoC'25)!

InLighnX Global Pvt Ltd (InLighn Tech)

Project Intern

July 2025 - September 2025 (3 months)

India

Open Source Connect

Contributor

July 2025 - September 2025 (3 months)

India

Micro Information Technology Services

Intern

July 2025 - July 2025 (1 month)

Internship Studio

2 months

Frontend Developer

June 2025 - July 2025 (2 months)

- Collaborated on a full AI-based web development project aimed at assisting visually impaired individuals through Janshayog.
- Designed and implemented user-friendly features to enhance accessibility and usability for blind users.
- Conducted user testing and gathered feedback to refine the tool, ensuring it met the needs of the target audience.
- Developed strong skills in AI integration, web development, and user experience design.

Full-stack Developer

June 2025 - July 2025 (2 months)

- Developed a user-friendly website for government portals to assist citizens in finding relevant schemes.
- Collaborated with cross-functional teams to ensure seamless integration of policy information and application guidance.
- Enhanced user experience through responsive design and efficient navigation, leading to increased user engagement.

Education

GLA University

Bachelor of Technology - BTech, Computer Science · (2023 - 2027)

RRSSS

10 + 2 with Mathematics and Science , PCM · (April 2017 - June 2023)
